### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on 31 March 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

***Election/Restriction***

1. Claims 15-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 3. The traversal is on the ground(s) that all the independent claims are drawn to a light assembly. This is not found persuasive. The **subcombinations** are distinct from each other because the examiner has shown that the inventions are separately useable (see restriction filed on 03/05/03).

The requirement is still deemed proper and is therefore made FINAL.

***Claim Rejections - 35 U.S.C. § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Lyons et al . Lyons et al discloses an elongated base (43, 24 and 26) having front and rear elongated slots (36 and 37). First and second electronics (70 and 80) enclosures are mounted to the base (62 and 43) at longitudinally spaced positions thereof. A top

Art Unit: 2875

panel 90 having front and rear elongated slots 92 is supported by the enclosures and generally parallel to the base (43, 24 and 26). At least one cover 68 is slidably received in the base and top and bottom panel front slots. At least one cover 66 is slidably received in the base and top panel rear slots to define an enclosure therebetween. A plurality of warning light assemblies is secured within the enclosure. Regarding claims 2-3, "extruded" is a product by process claim and given little patentable weight.

***Claim Rejections - 35 U.S.C. § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lyons et al. Lyons et al discloses the claimed invention except for the teaching that the panels are extruded. Lyons et al teaches that it is well known to extrude parts such as panels 20, 24 and 26. It would have been obvious to one skilled in the art to make all the panels via an extruding method since the examiner takes official

Art Unit: 2875

notice that extrusion is a well known and efficient method of making light housing parts as taught by Lyons et al.

***Allowable Subject Matter***

6. Claims 5-8 and 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Green et al discloses a heat sink inside the lamp enclosure. Stanuch et al discloses a light bar with a heat sink 44 exterior to the lamp enclosure. Ferenc discloses a low-profile modular lightbar assembly.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas M. Sember whose telephone number is (703) 308-1938. The examiner can normally be reached on Monday - Thursday from 8:00 AM - 5:00 PM. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea, can be reached at (703)-305-4939. The fax phone number for this group are (703) 872-9318 for regular communications and (703)-872-9319 for after-final communications.
